DR. ANIKA SHARMA

Scientist E — Atmospheric Instrumentation & Applied AI
anika.sharma@example.org | +91 00000 12345 | New Delhi, India | linkedin.com/in/anika-sharma-example

PROFESSIONAL SUMMARY

Electronics and avionics engineer with twelve years of airborne-systems integration and qualification testing, followed by ten years leading scientific instrumentation and edge-AI development in government service. Experienced in MIL-STD-1553 test rigs, UAV payload electronics, sensor telemetry, embedded GPU deployment and technical procurement.

TECHNICAL DOMAINS

Avionics (MIL-STD-1553 / ARINC 429, Avionics integration) · Scientific instrumentation (Environmental qualification testing, Sensor calibration, Radiosonde and upper-air systems) · Embedded systems (Embedded C, ESP32 / STM32 microcontrollers) · Edge AI (NVIDIA Jetson deployment) · Drones & UAV systems (UAV payload integration) · AI / machine learning (PyTorch, Deep learning) · IoT (MQTT and Node-RED, InfluxDB and Grafana) · Computer vision (Image super-resolution, Object detection) · GPU computing (CUDA / GPU computing) · Model optimisation (TensorRT and ONNX, Pruning and knowledge distillation) · Software & tools (Python, Docker and Linux) · Technical leadership (Team leadership)

PROFESSIONAL EXPERIENCE

Scientist E

Upper Air Instrumentation Division, Kestrel Atmospheric Instrumentation Laboratory · New Delhi · Jul 2016 – Present

Responsible for upper-air observation instruments, the division workshop and the laboratory's IoT and AI/ML activities.

Tools: Python, PyTorch, MQTT, Node-RED, InfluxDB, Grafana, Docker

- Lead a four-member AI/ML group developing lightweight super-resolution and detection models for UAV imagery, deployed on NVIDIA Jetson devices with TensorRT.
- Led acceptance testing and commissioning of radiosonde ground-receiving systems at three observing stations, writing the test protocol and the defect-tracking procedure.
- Designed and deployed an IoT monitoring network for laboratory infrastructure (ESP32 sensor nodes, MQTT, Node-RED, InfluxDB and Grafana dashboards) covering temperature, humidity and power quality.
- Prepared technical specifications and served on bid-evaluation committees for instrument procurement through the Government e-Marketplace in line with the General Financial Rules.
- Authored standard operating procedures for pre-flight checks and calibration of upper-air instruments used across the division.

Additional charge: **Workshop In-charge**, Upper Air Division Workshop — Apr 2019 – Present
Additional charge of the division workshop supporting instrument repair, fabrication and calibration.

Nodal officer: **Nodal Officer, IoT and AI/ML Initiatives** — Jan 2021 – Present

Senior Design Engineer

Avionics Integration Group, Halcyon Avionics Design Bureau · Bengaluru · Jun 2004 – Jun 2016

Integration and qualification testing of airborne electronics and UAV payloads.

Tools: MIL-STD-1553, ARINC 429, LabVIEW, C, MATLAB

- Developed payload interface electronics for a fixed-wing UAV electro-optical sensor and supported its ground and flight trials.

Graduate Engineer

Test Systems Group, Meridian Electronics Limited · Bengaluru · Aug 2002 – May 2004

Built automated test equipment for avionics line-replaceable units.

Tools: LabVIEW, C

- Developed LabVIEW test sequences for power-supply and interface boards of avionics units.

TECHNICAL PROJECTS

Edge super-resolution pipeline for UAV imagery *(Ongoing)*

Principal investigator, Kestrel Atmospheric Instrumentation Laboratory · Sep 2021 – Present

Research prototype that enhances low-resolution UAV video in real time on embedded GPUs using pruned and distilled deep networks.

Technologies: NVIDIA Jetson Xavier NX, NVIDIA Jetson Orin Nano, PyTorch, TensorRT, ONNX, Docker, Structured pruning, Knowledge distillation, INT8 quantisation

- Implemented structured channel pruning and knowledge distillation to shrink the super-resolution network for embedded deployment.
- Converted models through ONNX to INT8 TensorRT engines, achieving 3.1× faster inference on Jetson Xavier NX.

EDUCATION

Ph.D., Electrical and Electronics Engineering

Northfield Institute of Science and Technology · 2021 – ongoing

Thesis: Lightweight deep networks for real-time enhancement of aerial imagery

Fictional sample profile — not a real person

M.Tech., Avionics
Coastal Institute of Aeronautical Engineering · Chennai · 2010
Grade: CGPA 8.6/10
Thesis: Fault-tolerant data acquisition for airborne test instrumentation

B.E., Electronics and Communication Engineering
Northfield Institute of Science and Technology, Northfield University · Pune · 2004
Grade: First Class with Distinction

LEADERSHIP & RESPONSIBILITIES

Supervisor, M.Tech. interns in applied machine learning
Kestrel Atmospheric Instrumentation Laboratory · 2022 – Present
Supervise summer and dissertation interns on edge-AI projects.

Chair, Technical Evaluation Committee for radiosonde procurement
Kestrel Atmospheric Instrumentation Laboratory · Apr 2023 – Feb 2024
Chaired technical evaluation of bids for upper-air sounding systems.

- Evaluation report accepted by the competent authority.

CERTIFICATIONS & TRAINING

Deep Learning for Edge Devices
Example Academy of Applied Computing · Mar 2022
Duration: 40 hours
Credential: EAAC-DL-0042
Valid until: Mar 2029

Workshop on Efficient Deep Learning for Embedded Vision
Example Conference on Instrumentation (ECI 2023) · Dec 2023
Duration: 2 days

National Seminar on Upper-Air Observing Systems
Example Society of Atmospheric Instrumentation · Aug 2021
Duration: 1 day

Mid-Career Training Programme for Scientists
Example Institute of Scientific Administration (sponsored by Ministry of Example Sciences) · Feb 2020
Duration: 10 days

AWARDS & HONOURS

Best Paper Award
Example Conference on Instrumentation (ECI 2023) · 2023

TECHNICAL SKILLS

Avionics: MIL-STD-1553 / ARINC 429, Avionics integration
Scientific instrumentation: Environmental qualification testing, Sensor calibration, Radiosonde and upper-air systems
Embedded systems: Embedded C, ESP32 / STM32 microcontrollers
Edge AI: NVIDIA Jetson deployment
Drones & UAV systems: UAV payload integration
AI / machine learning: PyTorch, Deep learning
IoT: MQTT and Node-RED, InfluxDB and Grafana
