Dr. Anika Sharma

Scientist E — Atmospheric Instrumentation & Applied AI

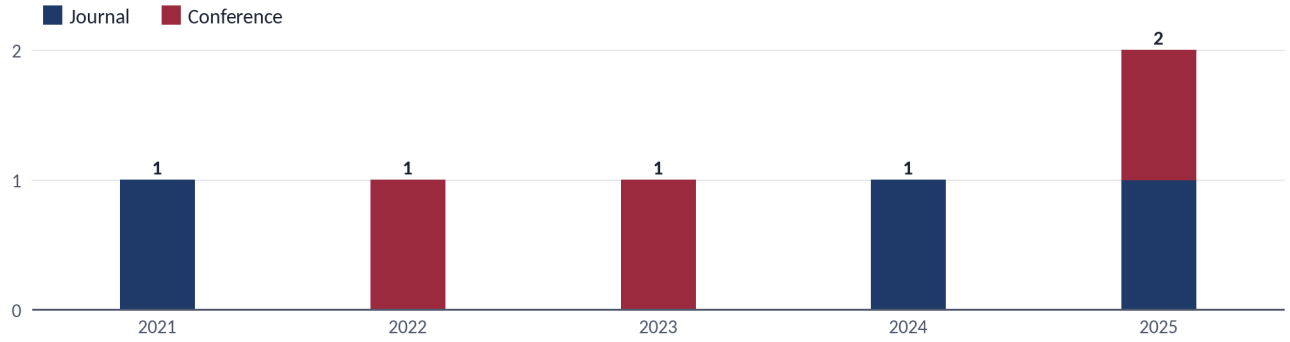

✉ anika.sharma@example.org ☎ +91 00000 12345 ☖ New Delhi, India ➤ ORCID 0000-0002-1825-0097 ➤ anika-sharma.example.org

Research Profile

Electronics and avionics engineer with twelve years of airborne-systems integration and qualification testing, followed by ten years leading scientific instrumentation and edge-AI development in government service. Experienced in MIL-STD-1553 test rigs, UAV payload electronics, sensor telemetry, embedded GPU deployment and technical procurement.

Fictional sample profile — not a real person

Research Projects

Edge super-resolution pipeline for UAV imagery *(Ongoing)* **Sep 2021 – Present**

Principal investigator, Kestrel Atmospheric Instrumentation Laboratory

Research prototype that enhances low-resolution UAV video in real time on embedded GPUs using pruned and distilled deep networks.

- Implemented structured channel pruning and knowledge distillation to shrink the super-resolution network for embedded deployment.
- Converted models through ONNX to INT8 TensorRT engines, achieving 3.1× faster inference on Jetson Xavier NX.

Technologies: NVIDIA Jetson Xavier NX, NVIDIA Jetson Orin Nano, PyTorch, TensorRT, ONNX, Docker, Structured pruning, Knowledge distillation, INT8 quantisation

Radiosonde ground-station acceptance test protocol **Jan 2018 – Mar 2019**

Coordinator

Challenge: Station acceptance testing varied between sites.

Outcome: A common acceptance protocol and checklist adopted for new ground-receiving systems.

IoT monitoring of laboratory infrastructure **Feb 2020 – Jun 2022**

Project lead

Challenge: Instrument rooms lacked continuous environmental and power-quality monitoring.

Approach: Deployed ESP32 sensor nodes publishing over MQTT to a Node-RED flow, InfluxDB time-series storage and Grafana dashboards with threshold alerts.

Outcome: Continuous monitoring with automated alerts replaced manual twice-daily readings.

Technologies: ESP32, Environmental sensors, MQTT, Node-RED, InfluxDB, Grafana

Research Grants & Funding

Seed grant: edge-AI enhancement of aerial imagery *(Completed)* Apr 2023 – Mar 2025

Principal investigator, Example Science Foundation (fictional)

Two-year seed project on lightweight super-resolution networks for embedded GPUs.

Reference: ESF/SEED/2023/017

Talks & Presentations

Invited talk: Edge AI for atmospheric observation 2024

Example Symposium on Applied AI

Appointments

Scientist E Jul 2016 – Present

Upper Air Instrumentation Division, Kestrel Atmospheric Instrumentation Laboratory, New Delhi

Responsible for upper-air observation instruments, the division workshop and the laboratory's IoT and AI/ML activities.

- Lead a four-member AI/ML group developing lightweight super-resolution and detection models for UAV imagery, deployed on NVIDIA Jetson devices with TensorRT.
- Led acceptance testing and commissioning of radiosonde ground-receiving systems at three observing stations, writing the test protocol and the defect-tracking procedure.
- Designed and deployed an IoT monitoring network for laboratory infrastructure (ESP32 sensor nodes, MQTT, Node-RED, InfluxDB and Grafana dashboards) covering temperature, humidity and power quality.
- Prepared technical specifications and served on bid-evaluation committees for instrument procurement through the Government e-Marketplace in line with the General Financial Rules.
- Authored standard operating procedures for pre-flight checks and calibration of upper-air instruments used across the division.

Additional charge: **Workshop In-charge**, Upper Air Division Workshop Apr 2019 – Present

Additional charge of the division workshop supporting instrument repair, fabrication and calibration.

- Introduced a job-card and spares-inventory system for instrument repairs and calibration work.

Fictional sample profile — not a real person

- Supervise technicians and plan preventive maintenance for workshop test equipment.

Nodal officer: **Nodal Officer, IoT and AI/ML Initiatives** Jan 2021 – Present

Senior Design Engineer Jun 2004 – Jun 2016

Avionics Integration Group, Halcyon Avionics Design Bureau, Bengaluru

Integration and qualification testing of airborne electronics and UAV payloads.

- Developed payload interface electronics for a fixed-wing UAV electro-optical sensor and supported its ground and flight trials.
- Integrated mission-computer and display units on MIL-STD-1553 avionics buses and built the automated test rig used for bench validation.
- Mentored graduate engineer trainees on avionics bus protocols and test documentation.
- Planned environmental qualification (MIL-STD-810 vibration, temperature and humidity) for line-replaceable units and documented the test results.

Graduate Engineer Aug 2002 – May 2004

Test Systems Group, Meridian Electronics Limited, Bengaluru

Built automated test equipment for avionics line-replaceable units.

- Developed LabVIEW test sequences for power-supply and interface boards of avionics units.

Education

Ph.D., Electrical and Electronics Engineering 2021 – ongoing

Northfield Institute of Science and Technology

Thesis: Lightweight deep networks for real-time enhancement of aerial imagery

M.Tech., Avionics 2010

Coastal Institute of Aeronautical Engineering, Chennai

Grade: CGPA 8.6/10

Thesis: Fault-tolerant data acquisition for airborne test instrumentation

B.E., Electronics and Communication Engineering 2004

Northfield Institute of Science and Technology, Northfield University, Pune

Grade: First Class with Distinction

Professional Service

Reviewer, Example Journal of Atmospheric Instrumentation 2022 – Present

Example Journal of Atmospheric Instrumentation

Co-supervisor, two M.Tech. dissertations in embedded vision 2024 – 2025

Example Institute of Technology (fictional)

Awards & Honours

Best Paper Award 2023

Example Conference on Instrumentation (ECI 2023)

Professional Memberships

Member, Institution of Example Engineers 2010 – Present

Institution of Example Engineers

Certifications & Licences

Deep Learning for Edge Devices Mar 2022

Example Academy of Applied Computing

Used the model-compression techniques to deploy the drone super-resolution model on Jetson modules.

Duration: 40 hours

Credential: EAAC-DL-0042

Valid until: Mar 2029

Fictional sample profile — not a real person

Mode: Online
Skills: Deep learning, Edge AI, TensorRT

Academic English proficiency test *(Expired)* May 2016
Example Language Testing Board
Result: Overall band 8.0
Expired: May 2018

Workshops, Seminars & Conferences Attended

Workshop on Efficient Deep Learning for Embedded Vision Dec 2023
Example Conference on Instrumentation (ECI 2023)
Duration: 2 days

National Seminar on Upper-Air Observing Systems Aug 2021
Example Society of Atmospheric Instrumentation
Duration: 1 day

Technical Skills

Avionics
MIL-STD-1553 / ARINC 429 — Avionics integration
Scientific instrumentation
Environmental qualification testing — Sensor calibration
Radiosonde and upper-air systems
Embedded systems
Embedded C — ESP32 / STM32 microcontrollers
Edge AI
NVIDIA Jetson deployment
Drones & UAV systems
UAV payload integration
AI / machine learning
PyTorch — Deep learning
IoT
MQTT and Node-RED — InfluxDB and Grafana
Computer vision
Image super-resolution — Object detection
GPU computing
CUDA / GPU computing
Model optimisation
TensorRT and ONNX — Pruning and knowledge distillation
Software & tools
Python — Docker and Linux
Technical leadership
Team leadership
Procurement & administration
Technical procurement (GeM, GFR)

Bars show my own assessment of proficiency (five steps; five = expert).

Referees

Dr. R. Iyer (fictional)
Professor of Electronics, Example Institute of Technology
Research collaborator and co-author
Email: r.iyer@example.org
Telephone: +91 00000 54321
