Dr. Anika Sharma

Scientist E — Atmospheric Instrumentation & Applied AI

anika.sharma@example.org · +91 00000 12345 · New Delhi, India · ORCID 0000-0002-1825-0097 · anika-sharma.example.org

Research Profile

Electronics and avionics engineer with twelve years of airborne-systems integration and qualification testing, followed by ten years leading scientific instrumentation and edge-AI development in government service. Experienced in MIL-STD-1553 test rigs, UAV payload electronics, sensor telemetry, embedded GPU deployment and technical procurement.

Education

Ph.D., Electrical and Electronics Engineering 2021 – ongoing
Northfield Institute of Science and Technology
Thesis: Lightweight deep networks for real-time enhancement of aerial imagery
Supervisor: Prof. R. Iyer (fictional)

M.Tech., Avionics 2010
Coastal Institute of Aeronautical Engineering, Chennai
Grade: CGPA 8.6/10
Thesis: Fault-tolerant data acquisition for airborne test instrumentation

B.E., Electronics and Communication Engineering 2004
Northfield Institute of Science and Technology, Northfield University, Pune
Grade: First Class with Distinction

Publications

[1] **A. Sharma** and R. Iyer, "Knowledge-distilled lightweight networks for drone image super-resolution," accepted for publication in Example Transactions on Aerial Imaging.

Professional Experience

Scientist E Jul 2016 – Present
Upper Air Instrumentation Division, Kestrel Atmospheric Instrumentation Laboratory, New Delhi
Responsible for upper-air observation instruments, the division workshop and the laboratory's IoT and AI/ML activities.

- Lead a four-member AI/ML group developing lightweight super-resolution and detection models for UAV imagery, deployed on NVIDIA Jetson devices with TensorRT.
- Led acceptance testing and commissioning of radiosonde ground-receiving systems at three observing stations, writing the test protocol and the defect-tracking procedure.
- Designed and deployed an IoT monitoring network for laboratory infrastructure (ESP32 sensor nodes, MQTT, Node-RED, InfluxDB and Grafana dashboards) covering temperature, humidity and power quality.
- Prepared technical specifications and served on bid-evaluation committees for instrument procurement through the Government e-Marketplace in line with the General Financial Rules.

Additional charge: **Workshop In-charge**, Upper Air Division Workshop Apr 2019 – Present
Additional charge of the division workshop supporting instrument repair, fabrication and calibration.

Nodal officer: **Nodal Officer, IoT and AI/ML Initiatives** Jan 2021 – Present

Senior Design Engineer Jun 2004 – Jun 2016
Avionics Integration Group, Halcyon Avionics Design Bureau, Bengaluru
Integration and qualification testing of airborne electronics and UAV payloads.

Fictional sample profile — not a real person

- Developed payload interface electronics for a fixed-wing UAV electro-optical sensor and supported its ground and flight trials.

Graduate Engineer Aug 2002 – May 2004
Test Systems Group, Meridian Electronics Limited, Bengaluru
Built automated test equipment for avionics line-replaceable units.
- Developed LabVIEW test sequences for power-supply and interface boards of avionics units.

Research Projects

Edge super-resolution pipeline for UAV imagery *(Ongoing)* Sep 2021 – Present
Principal investigator, Kestrel Atmospheric Instrumentation Laboratory
Research prototype that enhances low-resolution UAV video in real time on embedded GPUs using pruned and distilled deep networks.
- Implemented structured channel pruning and knowledge distillation to shrink the super-resolution network for embedded deployment.

Research Grants & Funding

Seed grant: edge-AI enhancement of aerial imagery *(Completed)* Apr 2023 – Mar 2025
Principal investigator, Example Science Foundation (fictional)
Two-year seed project on lightweight super-resolution networks for embedded GPUs.
Reference: ESF/SEED/2023/017

Talks & Presentations

Invited talk: Edge AI for atmospheric observation 2024
Example Symposium on Applied AI

Awards & Honours

Best Paper Award 2023
Example Conference on Instrumentation (ECI 2023)

Professional Service

Reviewer, Example Journal of Atmospheric Instrumentation 2022 – Present
Example Journal of Atmospheric Instrumentation

Co-supervisor, two M.Tech. dissertations in embedded vision 2024 – 2025
Example Institute of Technology (fictional)

Professional Memberships

Member, Institution of Example Engineers 2010 – Present
Institution of Example Engineers

Certifications & Training

Deep Learning for Edge Devices Mar 2022
Example Academy of Applied Computing
Duration: 40 hours
Credential: EAAC-DL-0042
Valid until: Mar 2029

Technical Skills

Avionics: MIL-STD-1553 / ARINC 429, Avionics integration
Scientific instrumentation: Environmental qualification testing, Sensor calibration, Radiosonde and upper-air systems
Embedded systems: Embedded C, ESP32 / STM32 microcontrollers
Computer vision: Image super-resolution, Object detection
